BIOGRAPHY

Daniel Bodycomb has 8+ years of construction estimating experience as a diligent, resourceful, and organized team player who excels in fast-paced environments. Daniel oversees VERTEX Estimating Departments in multiple geographic markets, providing him with industry intelligence to minimize costs and maximize resources. Mr. Bodycomb has been integral in the development and implementation of VERTEX Tenant Improvements industry-leading QA/QC process for every project.

Mr. Bodycomb has a proven track record of successfully identifying labor and material costs and meeting time requirements by studying proposals, specifications, constructions plans and associated documents. His technical skills are combined with a practical understanding of risk management and financial issues. From his hands-on experience acting as many project roles, he possesses a thorough understanding of fundamental construction principals.
