**Eric Harper, CSP | Project Manager**

**EMAIL** eharper@vertexeng.com | **PHONE** 214.499.9234

**BIOGRAPHY**

Eric Harper, CSP, has more than 17 years of experience in the environmental industry as an environmental scientist and environmental consultant. His responsibilities have included performing Phase I environmental site assessments throughout the country, real estate portfolio review projects to assess environmental liability costs, Phase II subsurface contaminant delineation projects, Phase III soil and groundwater remedial projects as well as management of lead and asbestos abatement projects, insurance claims, health and safety audits, and wetland delineation project experience.

Currently, Mr. Harper serves as Project Manager for VERTEX in the Dallas/Ft. Worth office. He is responsible for site visits, report writing, regulatory file review, and timely completion of due diligence projects. He also performs asbestos sampling/abatement management, including developing an approach to work, preparing technical specifications and contracts, project bidding, management and oversight, and reporting. Mr. Harper also has served as the liaison among clients, contractors, and regulatory agencies.

Mr. Harper previously held the position of Environmental Consultant for an Oklahoma-based environmental consulting firm. His responsibilities included direct project management of numerous liner pipeline projects. In addition, he obtained environmental permits and conducted Phase I ESAs for industrial, commercial, and residential properties. All project responsibilities included client interaction and strict adherence to deadlines.
