BIOGRAPHY

Mr. Plainte has over 24 years of experience in the environmental industry and currently serves as the Vice President and Technical Director for VERTEX in the Mid-Atlantic Region. Mr. Plainte is responsible for account maintenance and technical oversight for VERTEX's more complex environmental projects, specializing in asbestos, lead, indoor air quality and microbiological/water intrusion related projects. His experience includes extensive environmental management of large-scale asbestos site assessment and abatement programs, as well as numerous environmental site assessments involving asbestos, lead, PCB and microbiological issues in support of due diligence and asset management for a host of nationally based equity and development clients.
